

SAKAI WEB PARTS SERVICE was updated on January 14, 2020.

On Internet Explorer (browser), if WEB PARTS SERVICE website (gs-sakainet.com) is added to Websites you've added to Compatibility View list by using IE's Compatibility View settings, the page is not rendered correctly.

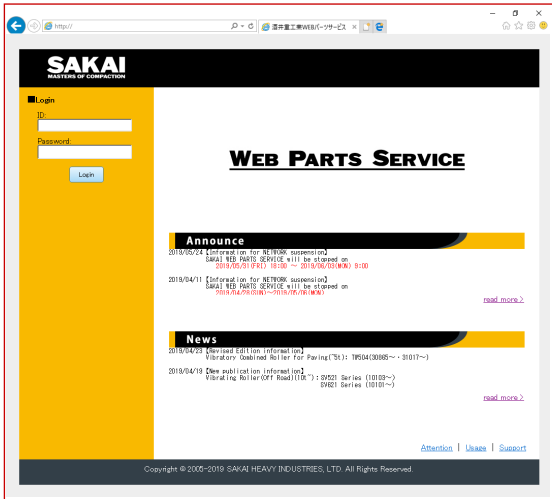

Please disable this Compatibility View settings.

How to check if Compatibility View settings is enabled

1. Start Internet Explorer (browser) and open the top page of SAKAI WEB PARTS SERVICE.

2. Check if the page is rendered correctly. (Refer to the image below)

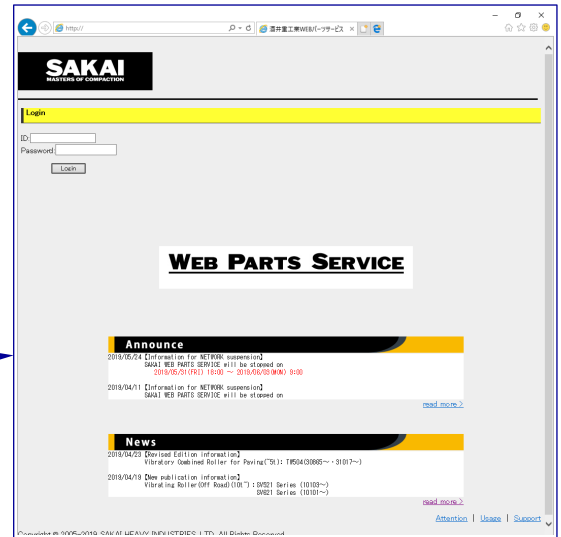

○ Compatibility View settings: disabled
※The page is rendered correctly.

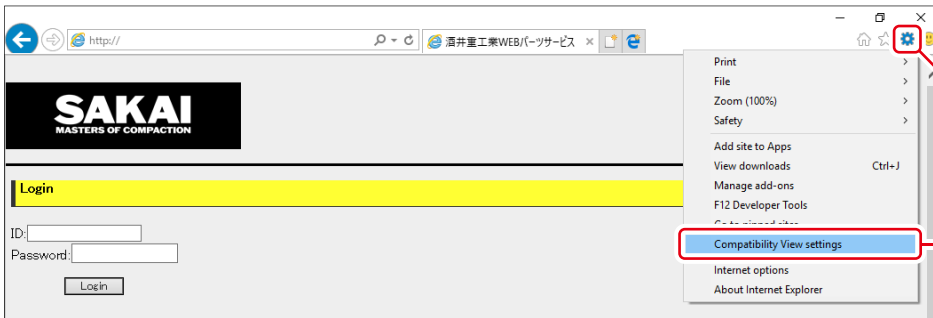

No action is required.
Please keep using your IE with the current settings.

✕ Compatibility View settings: enabled
※The page is not rendered correctly

Compatibility View settings needs to be disabled.
Please follow the procedure below.

How to disable Compatibility View settings

① Start Internet Explorer (browser) and open a page of SAKAI WEB PARTS SERVICE.

② Click the [⚙️ (Tools)] icon at upper right of the screen.

③ When the menu is displayed, click [Compatibility View settings].

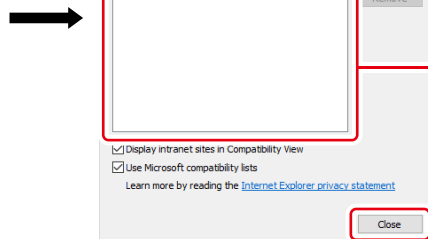

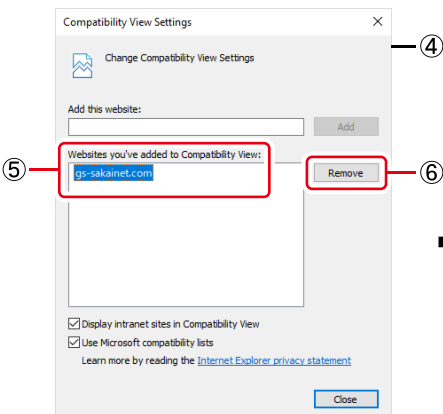

④ A separate window displays Compatibility View settings.

⑤ Select "gs-sakainet.com" listed in [Websites you've added to Compatibility View] field.

⑥ Click [Remove] button.

⑦ Ensure that "gs-sakainet.com" is no longer displayed in [Websites you've added to Compatibility View] field.

⑧ Click [Close] button and check the website is rendered correctly.

★ This completes the procedure to disable Compatibility View settings. ★

Because Compatibility View settings are saved, these settings need to be configured just once. From the subsequent accesses, the website should be rendered correctly.
